SUBJECT INDEX TO VOLUME 65, 1986

Explanation of symbols:

The page number on which an article begins is listed at the end of that article.

Page numbers followed by (+) indicate a winner in the Edward H. Hatton Awards Competition.

Page numbers followed by (!) indicate papers and reports for the Consensus Conference on Methods for Assessment of the Cariogenic Potential of Foods.

Page numbers followed by (#) indicate a Kreshover Lecture paper presentation.

ABSTRACTS

Abstracts of papers, annual session, AADR, March 12–15, 1986, Sheraton-Washington Hotel, Washington, D.C. 162

Abstracts of papers, IADR, Continental European Division, and Scandinavian Association for Dental Research, The Hague, The Netherlands, June 26–28, 1986. 714

Divisional abstracts of the IADR. 462

ACID-ETCHING, DENTAL

Effect of pH, concentration, and treatment time of aluminum solutions on acid dissolution of enamel. Putt, M.S., *et al.* 1356

Effects of calcium hydroxide on dentin permeability, The. Pashley, D.H., *et al.* 417

ACIDS

Complexes of iron cations with N-phenylglycinate or oxalic acid. Bowen, R.L., *et al.* 412

Effects of ammonia and volatile fatty acids produced by oral bacteria on tissue culture cells. van Steenbergen, T.J.M., *et al.* 909

Effects of fluorides on *in vitro* acid production by dental plaque. Bibby, B.G., *et al.* 686

ACTINOMYCES

Actinomyces adsorption mediated by type-1 fimbriae. Clark, W.B., *et al.* 1166

Actinomyces viscosus colonization of mouse teeth. Crawford, P.C., *et al.* 105

Effects of highly concentrated stannous fluoride and chlorhexidine regimes on human dental plaque flora. Schaeken, M.J.M., *et al.* 57

Glycogen synthetic abilities of *actinomyces viscosus* and *actinomyces naeslundii* freshly isolated from dental plaque over root surface caries lesions and non-carious sites. Komiyama, K., *et al.* 899

Growth of micro-organisms from supragingival dental plaque on saliva agar. De Jong, M.H., *et al.* 85

Incidence and characterization of anti-microbial effects produced by *actinomyces viscosus* and *actinomyces naeslundii*. Tompkins, G.R., *et al.* 109

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

ADENOSINE CYCLIC MONOPHOSPHATE

Exocytosis in rat parotid acini after *in vitro* treatment with forskolin is accompanied by cellular redistribution of regulatory subunits of cyclic AMP-dependent protein kinase. Mednieks, M.I., *et al.* 1057

ADRENAL CORTEX HORMONES

Liposomes as drug carriers for oral ulcers. Harsanyi, B.B., *et al.* 1133

AGAR

Growth of micro-organisms from supragingival dental plaque on saliva agar. De Jong, M.H., *et al.* 85

Production and characterization of monoclonal antibodies to *bacteroides gingivalis*. Simonson, L.G., *et al.* 95

AGGLUTININS

Identification of a *streptococcus sanguis* receptor for salivary agglutinins. Robinovitch, M.R., *et al.* 98

ALCOHOL, ETHYL

Influence of plasticizer on soft polymer gelation. Jones, D.W., *et al.* 634

ALKALINE PHOSPHATASE

Inorganic pyrophosphatase activity of purified bovine pulp alkaline phosphatase at physiological pH. Harada, M., *et al.* 125

ALUMINUM AND ALUMINUM SOLUTIONS

Effect of pH, concentration, and treatment time of aluminum solutions on acid dissolution of enamel. Putt, M.S., *et al.* 1356

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

AMELOGENESIS

Appearance of tooth enamel in children ingesting water with a high fluoride content for a limited period during early tooth development, The. Ishii, T., *et al.* 974

Correlated observations and analysis of maturation-ameloblast morphology and enamel mineralization. Debari, K., *et al.* 669

Dental fluorosis developed in post-secretory enamel. Richards, A., *et al.* 1406

Effects of fluoride on protein secretion and removal during enamel development in the rat. Den Besten, P.K. 1272+

Fluoride uptake and retention at various stages of rat molar enamel development. Bawden, J.W., *et al.* 34

AMINOACRIDINES

Effect of antimicrobial agents on root surface caries, alveolar bone loss, and microflora in rice rats. Toth, A., *et al.* 695

AMMONIA

Effects of ammonia and volatile fatty acids produced by oral bacteria on tissue culture cells. van Steenbergen, T.J.M., *et al.* 909

ANESTHESIA/ANESTHETICS

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

Long-term effects of two different treatments for dental fear and avoidance. Berggren, U. 874

ANTIBODIES

Actinomyces adsorption mediated by type-1 fimbriae. Clark, W.B., *et al.* 1166

Production and characterization of monoclonal antibodies to *bacteroides gingivalis*. Simonson, L.G., *et al.* 95

ANTIGENS

Host factors in juvenile periodontitis. Cogen, R.B., *et al.* 394

Interleukin-1 modulates T6 expression on a putative intra-epithelial langerhans cell precursor population. Walsh, L.J., *et al.* 1424

Oral mucosal langerhans cells express DR and DQ antigens. Walsh, L.J., *et al.* 390

ANXIETY

Long-term effects of two different treatments for dental fear and avoidance. Berggren, U. 874

ARYL HYDROCARBON HYDROXYLASE

Aryl hydrocarbon hydroxylase activity in rat submandibular glands. Murakami, K., *et al.* 39

ARYLAMIDASES

Arylaminopeptidase activities of oral bacteria. Suido, H., *et al.* 1335

ASCORBIC ACID

Response of lingual ascorbic acid test and salivary ascorbate levels to changes in ascorbic acid intake. Leggott, P.J., *et al.* 131

AXONS

Quantitative diameter analysis of lingual nerve axons in man. Heasman, P.A., *et al.* 1016

BACTERIA

Antimicrobial properties of hydrogen peroxide and sodium bicarbonate individually and in combination against selected oral, gram-negative, facultative bacteria. Miyasaki, K.T., *et al.* 1142

Arylaminopeptidase activities of oral bacteria. Suido, H., *et al.* 1335

Effects of ammonia and volatile fatty acids produced by oral bacteria on tissue culture cells. van Steenbergen, T.J.M., *et al.* 909

Effects of the availability of diet on the levels of exoglycosidases in the supragingival plaque of macaque monkeys, The. Smith, K., *et al.* 1349

Human plaque acidity models. Harper, D.S., *et al.* 1503!

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

BACTEROIDES

Arylaminopeptidase activities of oral bacteria. Suido, H., *et al.* 1335

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

Production and characterization of monoclonal antibodies to *bacteroides gingivalis*. Simonson, L.G., *et al.* 95

Susceptibility of *bacteroides gingivalis* to bactericidal activity of human serum. Okuda, K., *et al.* 1024

BARIUM

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

BEHAVIOR THERAPY

Long-term effects of two different treatments for dental fear and avoidance. Berggren, U. 874

BICARBONATES

Antimicrobial properties of hydrogen peroxide and sodium bicarbonate individually and in combination against selected oral, gram-negative, facultative bacteria. Miyasaki, K.T., *et al.* 1142

BLOOD

Effect of x-ray irradiation on lipid peroxide levels in the rat submandibular gland. Nishi, M., *et al.* 1028

BLOOD FLOW VELOCITY

Influence of 5-hydroxytryptamine (serotonin) on blood flow in the dog pulp, The. Kim, S., *et al.* 682

BONDING, DENTAL

Adhesion of polycarboxylate-based dental cements to enamel: an *in vivo* study. Jemt, T., *et al.* 885

Adsorption of benzoic acid on pure and cupric ion-modified hydroxyapatite: implications for design of a coupling agent to dental polymer composites. Misra, D.N. 706

Complexes of iron cations with N-phenylglycinate or oxalic acid. Bowen, R.L., *et al.* 412

Fracture resistance of teeth restored with Class II bonded composite resin. Eakle, W.S. 149

Glass-ionomer cements of improved flexural strength. Prosser, H.J., *et al.* 146

Impact of composite structure on its elastic response, The. Braem, M., *et al.* 648

Triazine monomers and their adhesion to dentin. Lee, C.H., *et al.* 1402

BONE AND BONE MARROW

Dexamethasone inhibits formation of osteoclast-like cells in bone-marrow cultures. Pharoah, M.J. 1006

Effect of antimicrobial agents on root surface caries, alveolar bone loss, and microflora in rice rats. Toth, A., *et al.* 695

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

CALCIUM HYDROXIDE

Effects of calcium hydroxide on dentin permeability, The. Pashley, D.H., *et al.* 417

CALCIUM SULFATE

Thermal behavior of the gypsum binder in dental casting investments. Mori, T. 877

CARCINOMA

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

CARIOGENIC AGENTS

Animal caries (working group report). Bowen, W.H. (chairman), *et al.* 1528[!]

Considerations in determining the cariogenic potential of foods: how should existing knowledge be combined? Stookey, G.K. 1525[!]

Demineralization/remineralization (working group report). Featherstone, J.D.B. (chairman), *et al.* 1532[!]

Executive summary. DePaola, D.P. 1540

Food cariogenicity in Americans aged from 9 to 29 years assessed in a national cross-sectional survey, 1971–74. Ismail, A.I. 1435

Integration of methods for determining the cariogenic potential of foods: is this possible with present technologies? Curzon, M.E.J. 1520[!]

Integration of methods (working group consensus report). Stamm, J.W. (chairman), *et al.* 1537[!]

In vitro methods for testing the cariogenic potential of foods. Clarkson, B.H. 1516[!]

In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44

Plaque acidity models for cariogenicity testing: some theoretical and practical observations. Edgar, W.M., *et al.* 1498[!]

CARIOSTATIC AGENTS

Distribution and retention of salivary fluoride from a sodium fluoride tablet following various intra-oral dissolution methods. Primosch, R.E., *et al.* 1001

Genetic analysis of *streptococcus mutans* virulence and prospects for an anticaries vaccine. Curtiss, R. III 1034[#]

Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30

CARTILAGE

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

CATALOGING

Establishment of a large collection of extracted teeth for research. Jablonski, N.G., *et al.* 123

CATIONS

Complexes of iron cations with N-phenylglycinate or oxalic acid. Bowen, R.L., *et al.* 412

CATS

Ultrastructural study of tooth resorption in the kitten, An. Ten Cate, A.R., *et al.* 1087

CATTLE

Inorganic pyrophosphatase activity of purified bovine pulp alkaline phosphatase at physiological pH. Harada, M., *et al.* 125

CELL ADHESION

Influence of chemically-induced modification of root surfaces on cell migration, attachment, and orientation, The. Lowenberg, B., *et al.* 1010

Interaction of salivary fibronectin with oral streptococci. Babu, J.P., *et al.* 1094

Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392[+]

CELL DEATH

Ultrastructural study of tooth resorption in the kitten, An. Ten Cate, A.R., *et al.* 1087

CELL MOVEMENT

Influence of chemically-induced modification of root surfaces on cell migration, attachment, and orientation, The. Lowenberg, B., *et al.* 1010

CHEEK

Comparison of some of the permeability characteristics of intact and tape-stripped hamster cheek pouches *in vitro*, A. Reid, C.O., *et al.* 673

Establishment of an improved implantation technique for hamster mucous membrane irritation testing. Roy, M., *et al.* 1365

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

CHEMOTAXIS

Pharmacological studies on the anti-inflammatory action of phenolic compounds. Azuma, Y., *et al.* 53

CHLORHEXIDINE

Effects of highly concentrated stannous fluoride and chlorhexidine regimes on human dental plaque flora. Schaeken, M.J.M., *et al.* 57

CHLORPROMAZINE

Chlorpromazine inhibition of muscarinic-cholinergic responses in the rat parotid gland. Van der Ven, P.F., *et al.* 382

COMPOSITE RESINS

Adsorption of benzoic acid on pure and cupric ion-modified hydroxyapatite: implications for design of a coupling agent to dental polymer composites. Misra, D.N. 706

Effect of abrasion medium on wear of stress-bearing composites and amalgam *in vitro*. De Gee, A.J., *et al.* 654

Effect of cavity depth and application technique on marginal adaptation of resins in dentin cavities. Hansen, E.K. 1319

Effect of cross-linking agents on the impact resistance of a linear poly(methyl methacrylate) denture-base polymer, The. Price, C.A. 987

Fracture resistance of teeth restored with Class II bonded composite resin. Eakle, W.S. 149

Fracture toughness of dental composites determined using the short-rod fracture toughness test. Pilliar, R.M., *et al.* 130

Impact of composite structure on its elastic response, The. Braem, M., *et al.* 648

Light scattering and gloss of an experimental quartz-filled composite. Campbell, P.M., *et al.* 892

Water sorption and filler characteristics of com-

posites for use in posterior teeth. Oysaed, H. *et al.* 1315

COMPUTER SIMULATION

Estimation of mercury body burden from dental amalgam: computer simulation of a metabolic compartmental model. Vimy, M.J., *et al.* 1415

CORROSION

Electrochemical and multispectroscopic study of corrosion of Ag-Pd-Cu-Au alloys, An. Niemi, L., *et al.* 888

High-copper amalgam evaluated after three years in city and country practices, A. Smales, R.J., *et al.* 1353

Tarnishing *in vivo* of Ag-Pd-Cu-Zn alloys. Herø, H., *et al.* 1303

CORTISONE

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

CRANIOMANDIBULAR INDEX

Reliability of a craniomandibular index. Fricton, J.R., *et al.* 1359

CROSS-LINKING AGENTS

Effect of cross-linking agents on the impact resistance of a linear poly(methyl methacrylate) denture-base polymer, The. Price, C.A. 987

CROWNS

Influence of metal thickness on stress distribution in metal-ceramic crowns. Anusavice, K.J., *et al.* 1173

CUSPID

Cinephotographic study of the role of the canine in limiting lateral jaw movement in *macaca fascicularis*, A. Kay, C.N., *et al.* 1300

CYSTEINE

Desulfuration of cysteine and methionine by *fusobacterium nucleatum*. Pianotti, R., *et al.* 913

DATA COLLECTION

Establishment of a large collection of extracted teeth for research. Jablonski, N.G., *et al.* 123

Examiner reliability in dental radiography. Valachovic, R.W., *et al.* 432

Percent agreement, Pearson's correlation, and Kappa as measures of inter-examiner reliability. Hunt, R.J., *et al.* 128

DENTAL ALLOYS

Clinical and radiographic assessment of a porous-surfaced, titanium alloy dental implant system in dogs. Deporter, D.A., *et al.* 1071

Electrochemical and multispectroscopic study of corrosion of Ag-Pd-Cu-Au alloys, An. Niemi, L., *et al.* 888

High-copper amalgam evaluated after three years in city and country practices, A. Smales, R.J., *et al.* 1353

High-resolution electron microscopic study of age-hardening in a commercial dental gold alloy. Yasuda, K., *et al.* 1179

Histological assessment of the initial healing response adjacent to porous-surfaced, titanium alloy dental implants in dogs, A. Deporter, D.A. *et al.* 1064

Influence of metal thickness on stress distribution in metal-ceramic crowns. Anusavice, K.J., *et al.* 1173

Measurement of galvanic current and electrical potential in extracted human teeth, A. Momoi, Y., *et al.* 1441

Relationship between hardness and structure of Pd-Cu-Ga alloys, The. Oden, A., *et al.* 75

Standardizing evaluations of the clinical marginal fracture of amalgam. Mahler, D.B., *et al.* 1108

Tarnishing *in vivo* of Ag-Pd-Cu-Zn alloys. Herø, H., *et al.* 1303

DENTAL AMALGAM

Elements in marginal seals at amalgam-tooth interfaces. Grossman, E.S. 998

Estimation of mercury body burden from dental amalgam: computer simulation of a metabolic compartmental model. Vimy, M.J., *et al.* 1415

High-copper amalgam evaluated after three years in city and country practices, A. Smales, R.J., *et al.* 1353

Measurement of galvanic current and electrical potential in extracted human teeth, A. Momoi, Y., *et al.* 1441

Standardizing evaluations of the clinical marginal fracture of amalgam. Mahler, D.B., *et al.* 1108

DENTAL ARCH

Size of the alveolar arch of the mandible in relation to that of the maxilla in 45, X females, Laine, T., *et al.* 1432

DENTAL CALCULUS

Relation between the presence of supragingival calculus and protease activity in dental plaque. Morita, M., *et al.* 703

DENTAL CARIES

Animal caries models — resource paper. Shaw, J.H. 1485[!]

Animal caries (working group report). Bowen, W.H. (chairman), *et al.* 1528[!]

Comparative recovery of *streptococcus mutans* on five isolation media, including a new simple selective medium. Schaeken, M.J.M., *et al.* 906

Considerations in determining the cariogenic potential of foods: how should existing knowledge be combined? Stookey, G.K. 1525[!]

Demineralization models:mechanistic aspects of the caries process with special emphasis on the possible role of foods. Ten Cate, J.M. 1511[!]

Demineralization/remineralization (working group report). Featherstone, J.D.B. (chairman), *et al.* 1532

Dental benefits of limited exposure to fluoridated water in childhood. Burt, B.A., *et al.* 1322

Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424

Dental caries prevalence in early Polynesians from the Hawaiian Islands. Keene, H.J. 935

Dental caries prevalence in Texas schoolchildren using water supplies with high and low lithium and fluoride. Curzon, M.E.J., *et al.* 421

Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371

Dental fluorosis developed in post-secretory enamel. Richards, A., *et al.* 1406

Determinants of requests for water fluoride assay among North Carolina dentists. Levy, S.M. *et al.* 71

Diet, nutrition, and food cariogenicity, Burt, B.A., *et al.* 1475!

Effect of antimicrobial agents on root surface caries, alveolar bone loss, and microflora in rice rats. Toth, A., *et al.* 695

Effect of low levels of fluoride in solution on enamel demineralization *in vitro*. Margolis, H.C., *et al.* 23

Effect of pH, concentration, and treatment time of aluminum solutions on acid dissolution of enamel. Putt, M.S., *et al.* 1356

Effects of certain salts on glucosyltransferase synthesis by *streptococcus mutans* strain PS-14. Takada, K., *et al.* 452

Effects of neutral salts in a bench-scale caries model. Brown, W.E., *et al.* 1115

Effects of two fluoride gels on fluoride uptake and phosphorus loss during artificial caries formation. Mellberg, J.R., *et al.* 1084

Evidence suggesting multiple binding sites in experimental pellicles for *streptococcus mutans* JBP. Peros, W.J., *et al.* 1332

Examiner reliability in dental radiography. Valachovic, R.W., *et al.* 432

Fluoride distribution in enamel after *in vitro* caries-like lesion formation. Clarkson, B.H., *et al.* 963

Food cariogenicity in Americans aged from 9 to 29 years assessed in a national cross-sectional survey, 1971–74. Ismail, A.I. 1435

Genetic analysis of *streptococcus mutans* virulence and prospects for an anticaries vaccine. Curtiss, R. III 1034[*]

Glycogen synthetic abilities of *actinomyces viscosus* and *actinomyces naeslundii* freshly isolated from dental plaque over root surface caries lesions and non-carious sites. Komiyama, K., *et al.* 899

Human plaque acidity (working group consensus report). Schachtele, C. (chairman), *et al.* 1530[!]

Human plaque acidity models. Harper, D.S., *et al.* 1503[!]

Integration of methods for determining the cariogenic potential of foods: is this possible with present technologies? Curzon, M.E.J. 1520[!]

Integration of methods (working group consensus report). Stamm, J.W. (chairman), *et al.* 1537[!]

In vitro methods for testing the cariogenic potential of foods. Clarkson, B.H. 1516[!]

In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410

In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44

In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-

section sandwich method. Mellberg, J.R., *et al.* 1078
Kinetic analysis of *streptococcus sanguis* adhesion to artificial pellicle. Cowan, M.M., *et al.* 1278+
Kinetics of dissolution of tooth enamel — a constant composition study, The. Chen, W.C., *et al.* 663
Nature of early caries lesions in enamel, The. Arends, J., *et al.* 2
Plaque acidity models for cariogenicity testing: some theoretical and practical observations. Edgar, W.M., *et al.* 1498‡
Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959
Root caries in an optimally fluoridated and a high-fluoride community. Burt, B.A., *et al.* 1154
Root surface caries and periodontal disease in long-term alloxan diabetic rats. Reuterving, C. -O. 689
Testing food cariogenicity with experimental animals. Tanzer, J.M. 1491‡
Theoretical study of *in vivo* lesion repair using a controlled-release device, A. Greene, W.M., *et al.* 1169
Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392+

DENTAL CASTING TECHNIC

Thermal behavior of the gypsum binder in dental casting investments. Mori, T. 877

DENTAL CAVITY PREPARATION

Effect of cavity depth and application technique on marginal adaptation of resins in dentin cavities. Hansen, E.K. 1319

DENTAL CEMENTS

Adhesion of polycarboxylate-based dental cements to enamel: an *in vivo* study. Jemt, T., *et al.* 885
Elements in marginal seals at amalgam-tooth interfaces. Grossman, E.S. 998
Glass-ionomer cements of improved flexural strength. Prosser, H.J., *et al.* 146

DENTAL CERAMICS

Fatigue of dental ceramics in a simulated oral environment. Morena, R., *et al.* 993

DENTAL ENAMEL (*see also* Tooth)

Appearance of tooth enamel in children ingesting water with a high fluoride content for a limited period during early tooth development, The. Ishii, T., *et al.* 974
Characterization of human dental plaque formed on hydrogen-ion-sensitive field-effect transistor electrodes. Chida, R., *et al.* 448
Correlated observations and analysis of maturation-ameloblast morphology and enamel mineralization. Debari, K., *et al.* 669
Dental fluorosis developed in post-secretory enamel. Richards, A., *et al.* 1406
Dental fluorosis in an area of Kenya with 2 ppm fluoride in the drinking water. Manji, F., *et al.* 659
Effect of low levels of fluoride in solution on enamel demineralization *in vitro*. Margolis, H.C., *et al.* 23
Effect of pH, concentration, and treatment time of aluminum solutions on acid dissolution of enamel. Putt, M.S., *et al.* 1356
Effects of fluoride on protein secretion and removal during enamel development in the rat. Den Besten, P.K. 1272+
Effects of neutral salts in a bench-scale caries model. Brown, W.E., *et al.* 1115
Effects of two fluoride gels on fluoride uptake and phosphorus loss during artificial caries formation. Mellberg, J.R., *et al.* 1084
Enamel demineralization and the length of intraoral exposure to different concentrations of glucose or sucrose. Tehrani, A., *et al.* 139
Enamel fluoride retention after DCPD and APF application and prolonged exposure to fluoride *in vitro*. Crall, J.J., *et al.* 387
Explanation for the "two fiber axes" problem in human enamel by x-ray diffraction, An. Hirota, F. 978
Fluoride distribution in enamel after *in vitro* caries-like lesion formation. Clarkson, B.H., *et al.* 963
Fluoride uptake and retention at various stages of rat molar enamel development. Bawden, J.W., *et al.* 34
Fracture resistance of teeth restored with Class II bonded composite resin. Eakle, W.S. 149
Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30
Intra-oral effect on enamel demineralization of extracellular matrix material synthesized from sucrose by *streptococcus mutans*, The. Zero, D.T., *et al.* 918
In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410
In vivo effects of a SnF_2 gel on acid-softened enamel. Clark, J.W., *et al.* 698
In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-section sandwich method. Mellberg, J.R., *et al.* 1078
Kinetic analysis of *streptococcus sanguis* adhesion to artificial pellicle. Cowan, M.M., *et al.* 1278+
Kinetics of dissolution of tooth enamel — a constant composition study, The. Chen, W.C., *et al.* 663
Measurement of the permeability of dental enamel and its variation with depth using an electrochemical method. Hoppenbrouwers, P.M.M., *et al.* 154
Nature of early caries lesions in enamel, The. Arends, J., *et al.* 2
Surface enamel fluoride concentrations of different types of human teeth in a high- and near-optimal fluoride area. Grobler, S.R., *et al.* 945
Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955
Wetting properties of human saliva and saliva substitutes. Vissink, A., *et al.* 1121

DENTAL IMPLANTATION

Clinical and radiographic assessment of a porous-surfaced, titanium alloy dental implant system in dogs. Deporter, D.A., *et al.* 1071
Histological assessment of the initial healing response adjacent to porous-surfaced, titanium alloy dental implants in dogs, A. Deporter, D.A. *et al.* 1064

DENTAL HEALTH SURVEYS

Percent agreement, Pearson's correlation, and Kappa as measures of inter-examiner reliability. Hunt, R.J., *et al.* 128

DENTAL OCCLUSION

Relationship between jaw movement and food breakdown in human mastication. Lucas, P.W., *et al.* 400
Variables affecting measurements of vertical occlusal force. Fields, H.W., *et al.* 135

DENTAL PLAQUE

Actinomyces viscosus colonization of mouse teeth. Crawford, P.C., *et al.* 105
Characterization of human dental plaque formed on hydrogen-ion-sensitive field-effect transistor electrodes. Chida, R., *et al.* 448
Comparative recovery of *streptococcus mutans* on five isolation media, including a new simple selective medium. Schaeken, M.J.M., *et al.* 906
Comparison of the potassium content and osmolality of plaque fluid and saliva, and the effects of plaque storage, A. Dibdin, G.H., *et al.* 1053
Dental benefits of limited exposure to fluoridated water in childhood. Burt, B.A., *et al.* 1322
Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424
Demineralization models: mechanistic aspects of the caries process with special emphasis on the possible role of foods. Ten Cate, J.M. 1511‡
Desulfuration of cysteine and methionine by *fusobacterium nucleatum*. Pianotti, R., *et al.* 913
Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49
Effects of ammonia and volatile fatty acids produced by oral bacteria on tissue culture cells. van Steenbergen, T.J.M., *et al.* 909
Effects of fluorides on *in vitro* acid production by dental plaque. Bibby, B.G., *et al.* 686
Effects of highly concentrated stannous fluoride and chlorhexidine regimes on human dental plaque flora. Schaeken, M.J.M., *et al.* 57
Effects of the availability of diet on the levels of exoglycosidases in the supragingival plaque of macaque monkeys, The. Smith, K., *et al.* 1349
Glycogen synthetic abilities of *actinomyces viscosus* and *actinomyces naeslundii* freshly isolated from dental plaque over root surface caries lesions and non-carious sites. Komiyama, K., *et al.* 899
Growth of micro-organisms from supragingival dental plaque on saliva agar. De Jong, M.H., *et al.* 85
Human plaque acidity (working group consensus report). Schachtele, C. (chairman), *et al.* 1530‡
Human plaque acidity models. Harper, D.S., *et al.* 1503‡
Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30
Integration of methods (working group consen-

sus report). Stamm, J.W. (chairman), *et al.* 1537[†]
In vivo measurements of sulcal plaque pH after topical applications of sorbitol and sucrose in rats fed sorbitol or sucrose. Firestone, A.R., *et al.* 1020
In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44
Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379[#]
Plaque acidity models for cariogenicity testing: some theoretical and practical observations. Edgar, W.M., *et al.* 1498[†]
Relation between the presence of supragingival calculus and protease activity in dental plaque. Morita, M., *et al.* 703
Theoretical analysis of the effects of plaque thickness and initial salivary sucrose concentration on diffusion of sucrose into dental plaque and its conversion to acid during salivary clearance, A. Dawes, C., *et al.* 89

DENTAL PORCELAIN

Analytical model to predict the effects of heating rate and applied load on glass transition temperatures of dental porcelain, An. DeHoff, P.H., *et al.* 643
Fatigue of dental ceramics in a simulated oral environment. Morena, R., *et al.* 993

DENTAL PULP

Effect of dentinal stimulation on pulp nerve function and pulp morphology in the dog, The. Hirvonen, T.J., *et al.* 1290
Influence of 5-hydroxytryptamine (serotonin) on blood flow in the dog pulp, The. Kim, S., *et al.* 682
Inorganic pyrophosphatase activity of purified bovine pulp alkaline phosphatase at physiological pH. Harada, M., *et al.* 125

DENTAL STRESS ANALYSIS

Analytical model to predict the effects of heating rate and applied load on glass transition temperatures of dental porcelain, An. DeHoff, P.H., *et al.* 643
Effect of abrasion medium on wear of stress-bearing composites and amalgam *in vitro*. De Gee, A.J., *et al.* 654
Fatigue of dental ceramics in a simulated oral environment. Morena, R., *et al.* 993
Fracture toughness of dental composites determined using the short-rod fracture toughness test. Pilliar, R.M., *et al.* 130
Influence of metal thickness on stress distribution in metal-ceramic crowns. Anusavice, K.J., *et al.* 1173

DENTIFRICES

In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410
In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-section sandwich method. Mellberg, J.R., *et al.* 1078
Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959

DENTIN

Demonstration of structural variation in rat incisor dentin as determined by the x-ray laue method. Mishima, H., *et al.* 932
Effect of cavity depth and application technique on marginal adaptation of resins in dentin cavities. Hansen, E.K. 1319
Effect of dentinal stimulation on pulp nerve function and pulp morphology in the dog, The. Hirvonen, T.J., *et al.* 1290
Effects of calcium hydroxide on dentin permeability, The. Pashley, D.H., *et al.* 417
Fracture resistance of teeth restored with Class II bonded composite resin. Eakle, W.S. 149
Fracture toughness of human dentin. El Mowafy, O.M. 677
Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12
Pharmacological studies on the anti-inflammatory action of phenolic compounds. Azuma, Y., *et al.* 53
Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959
Scanning and transmission electron microscopy of tubular structures presumed to be human odontoblast processes. Weber, D.F., *et al.* 982
Triazine monomers and their adhesion to dentin. Lee, C.H., *et al.* 1402
Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955

DENTITION

On the non-existence of compensatory tooth size interaction in a contemporary human population. Kieser, J.A., *et al.* 1105
Tooth loss and retention: analysis on 500 maxillae of a multitribal group of Bantu-speaking South African blacks. Tal, H., *et al.* 456

DENTURE LINERS

Influence of plasticizer on soft polymer gelation. Jones, D.W., *et al.* 634

DEXAMETHASONE

Dexamethasone inhibits formation of osteoclast-like cells in bone-marrow cultures. Pharoah, M.J. 1006

DEXTRANASE

Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392[+]

DIABETES

Immunoglobulins and innate antimicrobial factors in whole saliva of patients with insulin-dependent diabetes mellitus. Tenovuo, J., *et al.* 62
Root surface caries and periodontal disease in long-term alloxan diabetic rats. Reuterving, C. -O. 689

DIET

Animal caries models - resource paper. Shaw, J.H. 1485[†]
Animal caries (working group report). Bowen, W.H. (chairman), *et al.* 1528[†]
Demineralization models: mechanistic aspects of the caries process with special emphasis on the possible role of foods. Ten Cate, J.M. 1511[†]
Diet, nutrition, and food cariogenicity, Burt, B.A., *et al.* 1475[†]
Effects of the availability of diet on the levels of exoglycosidases in the supragingival plaque of macaque monkeys, The. Smith, K., *et al.* 1349
Food cariogenicity in Americans aged from 9 to 29 years assessed in a national cross-sectional survey, 1971–74. Ismail, A.I. 1435
Integration of methods for determining the cariogenic potential of foods: is this possible with present technologies? Curzon, M.E.J. 1520[†]
In vitro methods for testing the cariogenic potential of foods. Clarkson, B.H. 1516[†]
Response of lingual ascorbic acid test and salivary ascorbate levels to changes in ascorbic acid intake. Leggott, P.J., *et al.* 131
Testing food cariogenicity with experimental animals. Tanzer, J.M. 1491[†]

DMBA

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

DMF INDEX

Dental caries prevalence in Texas schoolchildren using water supplies with high and low lithium and fluoride. Curzon, M.E.J., *et al.* 421
Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371
Food cariogenicity in Americans aged from 9 to 29 years assessed in a national cross-sectional survey, 1971–74. Ismail, A.I. 1435
Interpreting the correlation coefficient when one of the variables is discrete. Appleton, D.R., *et al.* 1346

DOGS

Clinical and radiographic assessment of a porous-surfaced, titanium alloy dental implant system in dogs. Deporter, D.A., *et al.* 1071
Effect of dentinal stimulation on pulp nerve function and pulp morphology in the dog, The. Hirvonen, T.J., *et al.* 1290
Effects of photoinitiators for the visible-light resin system on hemolysis of dog erythrocytes and lipid peroxidation of their components. Fujisawa, S., *et al.* 1186
Histological assessment of the initial healing response adjacent to porous-surfaced, titanium alloy dental implants in dogs, A. Deporter, D.A. *et al.* 1064
Influence of 5-hydroxytryptamine (serotonin) on blood flow in the dog pulp, The. Kim, S., *et al.* 682
Kinin generation in the gingival inflammatory response to topically applied bacterial lipopolysaccharides. Montgomery, E.H., *et al.* 113

DRINKING WATER

Appearance of tooth enamel in children ingesting water with a high fluoride content for a limited period during early tooth development, The. Ishii, T., *et al.* 974
Dental benefits of limited exposure to fluori-

dated water in childhood. Burt, B.A., *et al.* 1322
Dental caries prevalence in Texas schoolchildren using water supplies with high and low lithium and fluoride. Curzon, M.E.J., *et al.* 421
Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371
Dental fluorosis in an area of Kenya with 2 ppm fluoride in the drinking water. Manji, F., *et al.* 659
Determinants of requests for water fluoride assay among North Carolina dentists. Levy, S.M. *et al.* 71
Effects of fluoride on protein secretion and removal during enamel development in the rat. Den Besten, P.K. 1272+
Prenatal fluoride exposure: measurement of plasma levels and enamel uptake in the guinea pig. Parker, P.R., *et al.* 1341

ELECTROCHEMISTRY

Measurement of the permeability of dental enamel and its variation with depth using an electrochemical method. Hoppenbrouwers, P.M.M., *et al.* 154

ELECTRODES

Characterization of human dental plaque formed on hydrogen-ion-sensitive field-effect transistor electrodes. Chida, R., *et al.* 448

ELECTROMYOGRAPHY

Comparison of the reproducibility of EMG signals recorded from human masseter and lateral pterygoid muscles. Dahan, J., *et al.* 441
Functional comparison of the deep and superficial parts of the human anterior temporal muscle, A. Wood, W.W. 924

ELECTRON PROBE MICROANALYSIS

Elements in marginal seals at amalgam-tooth interfaces. Grossman, E.S. 998

ENAMEL ORGAN

Correlated observations and analysis of maturation-ameloblast morphology and enamel mineralization. Debari, K., *et al.* 669

ENZYME-LINKED IMMUNOSORBENT ASSAY

Production and characterization of monoclonal antibodies to *bacteroides gingivalis*. Simonson, L.G., *et al.* 95

ENZYMES

Arylaminopeptidase activities of oral bacteria. Suido, H., *et al.* 1335
Effects of the availability of diet on the levels of exoglycosidases in the supragingival plaque of macaque monkeys, The. Smith, K., *et al.* 1349

EPITHELIAL CELLS

Interleukin-1 modulates T6 expression on a putative intra-epithelial langerhans cell precursor population. Walsh, L.J., *et al.* 1424
Rates of epithelial cell proliferation in the oral mucosa and skin of the tamarin monkey (*saguinus fuscicollis*). Rowat, J.S., *et al.* 1326

ERYTHROCYTES

Effects of photoinitiators for the visible-light resin, system on hemolysis of dog erythrocytes and lipid peroxidation of their components. Fujisawa, S., *et al.* 1186

EXOCYTOSIS

Exocytosis in rat parotid acini after *in vitro* treatment with forskolin is accompanied by cellular redistribution of regulatory subunits of cyclic AMP-dependent protein kinase. Mednieks, M.I., *et al.* 1057

FIBROBLASTS

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

FIBRONECTINS

Interaction of salivary fibronectin with oral streptococci. Babu, J.P., *et al.* 1094

FIMBRIAE, BACTERIAL

Actinomyces adsorption mediated by type-1 fimbriae. Clark, W.B., *et al.* 1166

FLUORIDES

Appearance of tooth enamel in children ingesting water with a high fluoride content for a limited period during early tooth development, The. Ishii, T., *et al.* 974
Dental benefits of limited exposure to fluoridated water in childhood. Burt, B.A., *et al.* 1322
Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424
Dental caries prevalence in Texas schoolchildren using water supplies with high and low lithium and fluoride. Curzon, M.E.J., *et al.* 421
Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371
Dental fluorosis developed in post-secretory enamel. Richards, A., *et al.* 1406
Dental fluorosis in an area of Kenya with 2 ppm fluoride in the drinking water. Manji, F., *et al.* 659
Determinants of requests for water fluoride assay among North Carolina dentists. Levy, S.M. *et al.* 71
Distribution and retention of salivary fluoride from a sodium fluoride tablet following various intra-oral dissolution methods. Primosch, R.E., *et al.* 1001
Effect of low levels of fluoride in solution on enamel demineralization *in vitro*. Margolis, H.C., *et al.* 23
Effects of fluorides on *in vitro* acid production by dental plaque. Bibby, B.G., *et al.* 686
Effects of fluoride on protein secretion and removal during enamel development in the rat. Den Besten, P.K. 1272+
Effects of highly concentrated stannous fluoride and chlorhexidine regimes on human dental plaque flora. Schaeken, M.J.M. *et al.* 57
Effects of two fluoride gels on fluoride uptake and phosphorus loss during artificial caries formation. Mellberg, J.R., *et al.* 1084
Enamel fluoride retention after DCPD and APF application and prolonged exposure to fluoride *in vitro*. Crall, J.J., *et al.* 387
Fluoride distribution in enamel after *in vitro* caries-like lesion formation. Clarkson, B.H., *et al.* 963
Fluoride uptake and retention at various stages of rat molar enamel development. Bawden, J.W., *et al.* 34
Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30
In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410
In vivo effects of a SnF_2 gel on acid-softened enamel. Clark, J.W., *et al.* 698
In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44
In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-section sandwich method. Mellberg, J.R., *et al.* 1078
Modulation of the kinetics of induced neutrophil superoxide generation by fluoride. Gabler, W.L. *et al.* 1159
Prenatal fluoride exposure: measurement of plasma levels and enamel uptake in the guinea pig. Parker, P.R., *et al.* 1341
Root caries in an optimally fluoridated and a high-fluoride community. Burt, B.A., *et al.* 1154
Surface enamel fluoride concentrations of different types of human teeth in a high- and near-optimal fluoride area. Grobler, S.R., *et al.* 945
Theoretical study of *in vivo* lesion repair using a controlled-release device, A. Greene, W.M., *et al.* 1169

FOOD ANALYSIS

Considerations in determining the cariogenic potential of foods: how should existing knowledge be combined? Stookey, G.K. 1525[!]
In vitro methods for testing the cariogenic potential of foods. Clarkson, B.H. 1516[!]
Integration of methods for determining the cariogenic potential of foods: is this possible with present technologies? Curzon, M.E.J. 1520[!]

FORMATES

Production and degradation of formate by *veillonella dispar* ATCC 17745. Hoshino, E., *et al.* 903

FORSKOLIN

Exocytosis in rat parotid acini after *in vitro* treatment with forskolin is accompanied by cellular redistribution of regulatory subunits of cyclic AMP-dependent protein kinase. Mednieks, M.I., *et al.* 1057

FRACTURE MECHANICS

Fracture toughness of human dentin. El Mowafy, O.M. 677

FRUCTOSE (*see* Sweetening Agents)

FUSOBACTERIUM

Desulfuration of cysteine and methionine by *fusobacterium nucleatum*. Pianotti, R., *et al.* 913

GALVANIC CURRENT

Measurement of galvanic current and electrical potential in extracted human teeth, A. Momoi, Y., *et al.* 1441

GENE REGULATION

Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392+

GENETICS

Genetic analysis of *streptococcus mutans* virulence and prospects for an anticaries vaccine. Curtiss, R. III 1034#

GINGIVA

Kinin generation in the gingival inflammatory response to topically applied bacterial lipopolysaccharides. Montgomery, E.H., *et al.* 113

GINGIVAL FLUID

Metronidazole concentrations in human plasma, saliva, and gingival crevice fluid after a single dose. Van Oosten, M.A.C., *et al.* 1420

GINGIVITIS

Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424

Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49

GLUCOCORTICOIDS

Dexamethasone inhibits formation of osteoclast-like cells in bone-marrow cultures. Pharoah, M.J. 1006

GLUCOSE (*see* Sweetening Agents)

GLUCOSYLTRANSFERASES

Effects of certain salts on glucosyltransferase synthesis by *streptococcus mutans* strain PS-14. Takada, K., *et al.* 452

Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392+

GLYCOGEN

Glycogen synthetic abilities of *actinomyces viscosus* and *actinomyces naeslundii* freshly isolated from dental plaque over root surface caries lesions and non-carious sites. Komiyama, K., *et al.* 899

GLYCOPROTEINS

Oral mucosal langerhans cells express DR and DQ antigens. Walsh, L.J., *et al.* 390

GROWTH INHIBITORS

In vitro studies of growth and competition between *S. salivarius* TOVE-R and mutans streptococci. Kurasz, A.B. 1149

GUINEA PIGS

Pharmacological studies on the anti-inflammatory action of phenolic compounds. Azuma, Y., *et al.* 53

Prenatal fluoride exposure: measurement of plasma levels and enamel uptake in the guinea pig. Parker, P.R., *et al.* 1341

HAMSTERS

Comparison of some of the permeability characteristics of intact and tape-stripped hamster cheek pouches *in vitro*. A. Reid, C.O., *et al.* 673

Establishment of an improved implantation technique for hamster mucous membrane irritation testing. Roy, M., *et al.* 1365

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

HAWAII

Dental caries prevalence in early Polynesians from the Hawaiian Islands. Keene, H.J. 935

HONG KONG

Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371

HOST-PARASITE RELATIONS

Evidence suggesting multiple binding sites in experimental pellicles for *streptococcus mutans* JBP. Peros, W.J., *et al.* 1332

Host factors in juvenile periodontitis. Cogen, R.B., *et al.* 394

Incidence and characterization of anti-microbial effects produced by *actinomyces viscosus* and *actinomyces naeslundii*. Tompkins G.R., *et al.* 109

HYALURONIDASE

Separation and properties of rabbit buccal mucosal wound hyaluronidase. Bertolami, C.N., *et al.* 939

HYDROGEN PEROXIDE

Antimicrobial properties of hydrogen peroxide and sodium bicarbonate individually and in combination against selected oral, gram-negative, facultative bacteria. Miyasaki, K.T., *et al.* 1142

HYDROXYAPATITES

Adsorption of benzoic acid on pure and cupric ion-modified hydroxyapatite: implications for design of a coupling agent to dental polymer composites. Misra, D.N. 706

Micro-Raman line broadening in synthetic carbonated hydroxapatite. de Mul, F.F.M., *et al.* 437

HYPERTROPHY

Adaptations in the temporalis muscles of rabbits after masseter muscle removal. Guelinckx, P., *et al.* 1294

IADR/AADR

Abstracts of papers, annual session, AADR, March 12–15, 1986, Sheraton-Washington Hotel, Washington, D.C. 162 ff

Abstracts of papers, IADR, Continental European Division, and Scandinavian Association for Dental Research, June 26–28, 1986, The Hague, The Netherlands. 714 ff

Divisional abstracts of the IADR. 462 ff

IADR AADR Council Proceedings. 1194–1267

IMAGE ANALYSIS SYSTEM

Image analysis system for the determination of tooth dimensions from study casts: comparison with manual measurements of mesiodistal diameter, An. Brook, A.H., *et al.* 428

IMMUNOGLOBULINS

Immunoglobulins and innate antimicrobial factors in whole saliva of patients with insulin-dependent diabetes mellitus. Tenovuo, J., *et al.* 62

Susceptibility of *bacteroides gingivalis* to bactericidal activity of human serum. Okuda, K., *et al.* 1024

INCISOR

Demonstration of structural variation in rat incisor dentin as determined by the x-ray laue method. Mishima, H., *et al.* 932

Effect of intermittent forces on eruption of the rabbit incisor, The. Proffit, W.R., *et al.* 118

Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49

INFORMATION SYSTEMS

Establishment of a large collection of extracted teeth for research. Jablonski, N.G., *et al.* 123

KALLIKREIN

Levels of glandular kallikrein in whole saliva obtained from patients with solid tumors remote from the oral cavity. Jenzano, J.W., *et al.* 67

KENYA

Dental fluorosis in an area of Kenya with 2 ppm fluoride in the drinking water. Manji, F., *et al.* 659

KININS

Kinin generation in the gingival inflammatory response to topically applied bacterial lipopolysaccharides. Montgomery, E.H., *et al.* 113

LANGERHANS CELLS

Interleukin-1 modulates T6 expression on a putative intra-epithelial langerhans cell precursor population. Walsh, L.J., *et al.* 1424

Oral mucosal langerhans cells express DR and DQ antigens. Walsh, L.J., *et al.* 390

LIDOCAINE

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

LINGUAL NERVE

Quantitative diameter analysis of lingual nerve axons in man. Heasman, P.A., *et al.* 1016

LIPID PEROXIDES

Effect of x-ray irradiation on lipid peroxide levels in the rat submandibular gland. Nishi, M., *et al.* 1028

LIPOPOLYSACCHARIDES

Kinin generation in the gingival inflammatory

response to topically applied bacterial lipopolysaccharides. Montgomery, E.H., *et al.* 113

LIPOSOMES

Effects of photoinitiators for the visible-light resin system on hemolysis of dog erythrocytes and lipid peroxidation of their components. Fujisawa, S., *et al.* 1186

Liposomes as drug carriers for oral ulcers. Harsanyi, B.B., *et al.* 1133

LITHIUM

Dental caries prevalence in Texas schoolchildren using water with high and low lithium and fluoride. Curzon, M.E.J., *et al.* 421

LJP

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

MANDIBLE

Clinical and radiographic assessment of a porous-surfaced, titanium alloy dental implant system in dogs. Deporter, D.A., *et al.* 1071

Histological assessment of the initial healing response adjacent to porous-surfaced, titanium alloy dental implants in dogs, A. Deporter, D.A. *et al.* 1064

Size of the alveolar arch of the mandible in relation to that of the maxilla in 45, X females. Laine, T., *et al.* 1432

MANDIBULAR CONDYLE

Mandibular growth and histologic changes in condylar cartilage of rats intoxicated with vitamin D_3 or $1,25(OH)_2D_3$ and pair-fed (undernourished) rats. Weinreb, M. Jr., *et al.* 1449

MANDIBULAR MOVEMENT

Reliability of a craniomandibular index. Fricton, J.R., *et al.* 1359

MANNITOL (*see* Sweetening Agents)

MASSETER MUSCLES

Adaptations in the temporalis muscles of rabbits after masseter muscle removal. Guelinckx, P., *et al.* 1294

Comparison of the reproducibility of EMG signals recorded from human masseter and lateral pterygoid muscles. Dahan, J., *et al.* 441

MASTICATION

Cinephotographic study of the role of the canine in limiting lateral jaw movement in *macaca fascicularis*, A. Kay, C.N., *et al.* 1300

Relationship between jaw movement and food breakdown in human mastication. Lucas, P.W., *et al.* 400

MASTICATORY MUSCLES

Cinephotographic study of the role of the canine in limiting lateral jaw movement in *macaca fascicularis*, A. Kay, C.N., *et al.* 1300

MAXILLA

Size of the alveolar arch of the mandible in relation to that of the maxilla in 45,X females. Laine, T., *et al.* 1432

MEPIVACAINE

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

MERCURY

Estimation of mercury body burden from dental amalgam: computer simulation of a metabolic compartmental model. Vimy, M.J., *et al.* 1415

METHYL METHACRYLATES

Effect of cross-linking agents on the impact resistance of a linear poly(methyl methacrylate) denture-base polymer, The. Price, C.A. 987

METHIONINE

Desulfuration of cysteine and methionine by *fusobacterium nucleatum*. Pianotti, R., *et al.* 913

METRONIDAZOLE

Metronidazole concentrations in human plasma, saliva, and gingival crevice fluid after a single dose. Van Oosten, M.A.C., *et al.* 1420

MICE

Actinomyces viscosus colonization of mouse teeth. Crawford, P.C., *et al.* 105

MICRORADIOGRAPHY

Effects of two fluoride gels on fluoride uptake and phosphorus loss during artificial caries formation. Mellberg, J.R., *et al.* 1084

Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959

Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955

MICROSCOPY

ELECTRON

High-resolution electron microscopic study of age-hardening in a commercial dental gold alloy. Yasuda, K., *et al.* 1179

Ultrastructural study of tooth resorption in the kitten, An. Ten Cate, A.R., *et al.* 1087

ELECTRON, SCANNING

Characterization of human dental plaque formed on hydrogen-ion-sensitive field-effect transistor electrodes. Chida, R., *et al.* 448

Correlated observations and analysis of maturation-ameloblast morphology and enamel mineralization. Debari, K., *et al.* 669

Scanning and transmission electron microscopy of tubular structures presumed to be human odontoblast processes. Weber, D.F., *et al.* 982

TRANSMISSION ELECTRON

Relationship between hardness and structure of Pd-Cu-Ga alloys, The. Oden, A., *et al.* 75

MINCYCLINE

Effect of antimicrobial agents on root surface caries, alveolar bone loss, and microflora in rice rats. Toth, A., *et al.* 695

MODELS

ANALYTICAL

Analytical model to predict the effects of heating rate and applied load on glass transition temperatures of dental porcelain, An. DeHoff, P.H., *et al.* 643

ANIMAL

Animal caries models — resource paper. Shaw, J.H. 1485!

DENTAL

Demineralization/remineralization (working group report). Featherstone, J.D.B. (chairman), *et al.* 1532!

Effect of intermittent forces on eruption of the rabbit incisor, The. Proffit, W.R., *et al.* 118

Effects of neutral salts in a bench-scale caries model. Brown, W.E., *et al.* 1115

Estimation of mercury body burden from dental amalgam: computer simulation of a metabolic compartmental model. Vimy, M.J., *et al.* 1415

Hamster cheek pouch carcinoma: effect of incision and cortisone on growth, invasion, and metastasis. Tsiklakis, K., *et al.* 927

Human plaque acidity models. Harper, D.S., *et al.* 1503!

Nature of early caries lesions in enamel, The. Arends, J., *et al.* 2

Plaque acidity models for cariogenicity testing: some theoretical and practical observations. Edgar, W.M., *et al.* 1498!

Theoretical analysis of the effects of plaque thickness and initial salivary sucrose concentration on diffusion of sucrose into dental plaque and its conversion to acid during salivary clearance, A. Dawes, C., *et al.* 89

NUMERICAL

Numerical model of temporomandibular joint loading, A. Smith, D.M., *et al.* 1046

THEORETICAL

Theoretical study of *in vivo* lesion repair using a controlled-release device, A. Greene, W.M., *et al.* 1169

MOLAR (*see also* Tooth)

Histologic study of the width and nature of interradicular spaces in human adult pre-molars and molars, A. Heins, P.J., *et al.* 948

In vivo and *in vitro* study of the effects of vitamin A deficiency on rat third molar development. Harris, S.S., *et al.* 1445

Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955

MONKEYS

Effects of the availability of diet on the levels of exoglycosidases in the supragingival plaque of macaque monkeys, The. Smith, K., *et al.* 1349

Rates of epithelial cell proliferation in the oral mucosa and skin of the tamarin monkey (*saguinus fuscicollis*). Rowat, J.S., *et al.* 1326

MOTTLED ENAMEL

Appearance of tooth enamel in children ingesting water with a high fluoride content for a limited period during early tooth development, The. Ishii, T., *et al.* 974

Dental fluorosis in an area of Kenya with 2 ppm fluoride in the drinking water. Manji, F., *et al.* 659

MOUTH MUCOSA

Comparison of some of the permeability characteristics of intact and tape-stripped hamster cheek pouches *in vitro*, A. Reid, C.O., *et al.* 673

Rates of epithelial cell proliferation in the oral mucosa and skin of the tamarin monkey (*saguinus fuscicollis*). Rowat, J.S., *et al.* 1326

Separation and properties of rabbit buccal mucosal wound hyaluronidase. Bertolami, C.N., *et al.* 939

MOUTHWASHES

Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424

MUCOUS MEMBRANE

Establishment of an improved implantation technique for hamster mucous membrane irritation testing. Roy, M., *et al.* 1365

MUSCARINIC RECEPTORS

Chlorpromazine inhibition of muscarinic-cholinergic responses in the rat parotid gland. Van der Ven, P.F., *et al.* 382

MUSCLES

Adaptations in the temporalis muscles of rabbits after masseter muscle removal. Guelinckx, P., *et al.* 1294

Functional comparison of the deep and superficial parts of the human anterior temporal muscle, A. Wood, W.W. 924

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

NERVE FIBERS

Effect of dentinal stimulation on pulp nerve function and pulp morphology in the dog, The. Hirvonen, T.J., *et al.* 1290

NEURONS

Quantitative diameter analysis of lingual nerve axons in man. Heasman, P.A., *et al.* 1016

NEUTROPHILS

Modulation of the kinetics of induced neutrophil superoxide generation by fluoride. Gabler, W.L. *et al.* 1159

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

ODONTOBLASTS

Scanning and transmission electron microscopy of tubular structures presumed to be human odontoblast processes. Weber, D.F., *et al.* 982

ODONTOGENESIS

In vivo and *in vitro* study of the effects of vitamin A deficiency on rat third molar development. Harris, S.S., *et al.* 1445

ODONTOMETRY

Image analysis system for the determination of tooth dimensions from study casts: comparison with manual measurements of mesiodistal diameter, An. Brook, A.H., *et al.* 428

OPTICAL SCATTERING

Light scattering and gloss of an experimental quartz-filled composite. Campbell, P.M., *et al.* 892

ORAL HEALTH

Diet, nutrition, and food cariogenicity, Burt, B.A., *et al.* 1475

Dental caries status and dental treatment patterns of 12-year-old children in Hong Kong. King, N.M., *et al.* 1371

OSTEOCLASTS

Dexamethasone inhibits formation of osteoclast-like cells in bone-marrow cultures. Pharoah, M.J. 1006

PAROTID GLAND (*see* Salivary Glands)

PEPTIDE HYDROLASES

Arylaminopeptidase activities of oral bacteria. Suido, H., *et al.* 1335

PERIODONTAL DISEASE

Kinin generation in the gingival inflammatory response to topically applied bacterial lipopolysaccharides. Montgomery, E.H., *et al.* 113

Molecular factors influencing neutrophil defects in periodontal disease. Genco, R.J., *et al.* 1379#

Production and characterization of monoclonal antibodies to *bacteroides gingivalis*. Simonson, L.G., *et al.* 95

Relation between the presence of supragingival calculus and protease activity in dental plaque. Morita, M., *et al.* 703

Root surface caries and periodontal disease in long-term alloxan diabetic rats. Reuterving, C. -0. 689

Tooth loss and retention: analysis on 500 maxillae of a multitribal group of Bantu-speaking South African blacks. Tal, H., *et al.* 456

PERIODONTAL LIGAMENT

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

PERIODONTAL POCKET

Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49

PERIODONTITIS

Host factors in juvenile periodontitis. Cogen, R.B., *et al.* 394

Tooth loss and retention: analysis on 500 maxillae of a multitribal group of Bantu-speaking South African blacks. Tal, H., *et al.* 456

PHENOLS

Pharmacological studies on the anti-inflammatory action of phenolic compounds. Azuma, Y., *et al.* 53

PHOSPHATES

Enamel fluoride retention after DCPD and APF application and prolonged exposure to fluoride *in vitro*. Crall, J.J., *et al.* 387

PHOSPHOTRANSFERASES

Phosphorylation of salivary proteins by salivary gland protein kinase. Madapallimattam, G., *et al.* 405

PLAQUE METABOLISM

Effects of fluorides on *in vitro* acid production by dental plaque. Bibby, B.G., *et al.* 686

PLASMA

Metronidazole concentrations in human plasma, saliva, and gingival crevice fluid after a single dose. Van Oosten, M.A.C., *et al.* 1420

Prenatal fluoride exposure: measurement of plasma levels and enamel uptake in the guinea pig. Parker, P.R., *et al.* 1341

PLASTICIZERS

Influence of plasticizer on soft polymer gelation. Jones, D.W., *et al.* 634

POLYMERS

Effect of cross-linking agents on the impact resistance of a linear poly(methyl methacrylate) denture-base polymer, The. Price, C.A. 987

Influence of plasticizer on soft polymer gelation. Jones, D.W., *et al.* 634

POTASSIUM

Comparison of the potassium content and osmolality of plaque fluid and saliva, and the effects of plaque storage, A. Dibdin, G.H., *et al.* 1053

PREGNANCY, ANIMAL

Prenatal fluoride exposure: measurement of plasma levels and enamel uptake in the guinea pig. Parker, P.R., *et al.* 1341

PRILOCAINE

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

PROCEEDINGS

IADR/AADR Council Proceedings. 1194–1267

PROTEASES

Relation between the presence of supragingival calculus and protease activity in dental plaque. Morita, M., *et al.* 703

PYROPHOSPHATASES

Inorganic pyrophosphatase activity of purified bovine pulp alkaline phosphatase at physiological pH. Harada, M., *et al.* 125

RABBITS

Adaptations in the temporalis muscles of rabbits after masseter muscle removal. Guelinckx, P., *et al.* 1294

Effect of intermittent forces on eruption of the rabbit incisor, The, Proffit, W.R., *et al.* 118

Humoral responses and cross-reactivity to viridans streptococci in recurrent aphthous ulceration. Hoover, C.I., *et al.* 1101

Separation and properties of rabbit mucosal wound hyaluronidase. Bertolami, C.N., *et al.* 939

RADIATION

Effects of photoinitiators for the visible-light resin system on hemolysis of dog erythrocytes and lipid peroxidation of their components. Fujisawa, S., *et al.* 1186

RADIOGRAPHY

Clinical and radiographic assessment of a porous-surfaced, titanium alloy dental implant system in dogs. Deporter, D.A., *et al.* 1071

Enhancement of tomosynthetic images in dental radiology. van der Stelt, P.F., *et al.* 967

Examiner reliability in dental radiography. Valachovic, R.W., *et al.* 432

In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-section sandwich method. Mellberg, J.R., *et al.* 1078

RADIOGRAPHIC IMAGE ENHANCEMENT

Enhancement of tomosynthetic images in dental radiology. van der Stelt, P.F., *et al.* 967

RATS

Animal caries models — resource paper. Shaw, J.H. 1485[1]

Animal caries (working group report). Bowen, W.H. (chairman), *et al.* 1528[1]

Aryl hydrocarbon hydroxylase activity in rat submandibular glands. Murakami, K., *et al.* 39

Chlorpromazine inhibition of muscarinic-cholinergic responses in the rat parotid gland. Van der Ven, P.F., *et al.* 382

Comparative effects of local anesthetic preparations on gingival fibroblasts of the rat. Johnson, R.B., *et al.* 1125

Demonstration of structural variation in rat incisor dentin as determined by the x-ray laue method. Mishima, H., *et al.* 932

Effect of antimicrobial agents on root surface caries, alveolar bone loss, and microflora in rice rats. Toth, A., *et al.* 695

Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49

Effect of x-ray irradiation on lipid peroxide levels in the rat submandibular gland. Nishi, M., *et al.* 1028

Effects of fluoride on protein secretion and removal during enamel development in the rat. Den Besten, P.K. 1272+

Effects of substance P and substance P antagonists on rat salivary secretion. Bobyock, E., *et al.* 1427

Fluoride uptake and retention at various stages of rat molar enamel development. Bawden, J.W., *et al.* 34

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

Integration of methods (working group consensus report). Stamm, J.W. (chairman), *et al.* 1537[1]

In vitro studies of growth and competition between *S. salivarius* TOVE-R and mutans streptococci. Kurasz, A.B. 1149

In vivo and *in vitro* study of the effects of vitamin A deficiency on rat third molar development. Harris, S.S., *et al.* 1445

In vivo measurements of sulcal plaque pH after topical applications of sorbitol and sucrose in rats fed sorbitol or sucrose. Firestone, A.R., *et al.* 1020

In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44

Mandibular growth and histologic changes in condylar cartilage of rats intoxicated with vitamin D_3 or $1,25(OH)_2D_3$ and pair-fed (undernourished) rats. Weinreb, M. Jr., *et al.* 1449

Root surface caries and periodontal disease in long-term alloxan diabetic rats. Reuterving, C. -O. 689

Testing food cariogenicity with experimental animals. Tanzer, J.M. 1491[1]

SALIVA

Comparative recovery of *streptococcus mutans* on five isolation media, including a new simple selective medium. Schaeken, M.J.M., *et al.* 906

Comparison of the potassium content and osmolality of plaque fluid and saliva, and the effects of plaque storage, A. Dibdin, G.H., *et al.* 1053

Distribution and retention of salivary fluoride from a sodium fluoride tablet following various intra-oral dissolution methods. Primosch, R.E., *et al.* 1001

Effects of substance P and substance P antagonists on rat salivary secretion. Bobyock, E., *et al.* 1427

Electrochemical and multispectroscopic study of corrosion of Ag-Pd-Cu-Au alloys, An. Niemi, L., *et al.* 888

Enamel demineralization and the length of intraoral exposure to different concentrations of glucose or sucrose. Tehrani, A., *et al.* 139

Evidence suggesting multiple binding sites in experimental pellicles for *streptococcus mutans* JBP. Peros, W.J., *et al.* 1332

Growth of micro-organisms from supragingival dental plaque on saliva agar. De Jong, M.H., *et al.* 85

Identification of a *streptococcus sanguis* receptor for salivary agglutinins. Robinovitch, M.R., *et al.* 98

Immunoglobulins and innate antimicrobial factors in whole saliva of patients with insulin-dependent diabetes mellitus. Tenovuo, J., *et al.* 62

Interaction of salivary fibronectin with oral streptococci. Babu, J.P., *et al.* 1094

Levels of glandular kallikrein in whole saliva obtained from patients with solid tumors remote from the oral cavity. Jenzano, J.W., *et al.* 67

Metronidazole concentrations in human plasma, saliva, and gingival crevice fluid after a single dose. Van Oosten, M.A.C., *et al.* 1420

Response of lingual ascorbic acid test and salivary ascorbate levels to changes in ascorbic acid intake. Leggott, P.J., *et al.* 131

10th International Conference on Oral Biology: saliva and salivary glands — a report. Dawes, C. 1191

Theoretical analysis of the effects of plaque thickness and initial salivary sucrose concentration on diffusion of sucrose into dental plaque and its conversion to acid during salivary clearance, A. Dawes, C., *et al.* 89

Wetting properties of human saliva and saliva substitutes. Vissink, A., *et al.* 1121

SALIVARY GLANDS

NOTE: Articles that report on experiments involving more than one type of gland are listed under this general heading. Articles reporting on specific glands are listed under those particular sub-headings.

Phosphorylation of salivary proteins by salivary gland protein kinase. Madapallimattam, G., *et al.* 405

10th International Conference on Oral Biology: saliva and salivary glands — a report. Dawes, C. 1191

PAROTID

Chlorpromazine inhibition of muscarinic-cholinergic responses in the rat parotid gland. Van der Ven, P.F., *et al.* 382

Exocytosis in rat parotid acini after *in vitro* treatment with forskolin is accompanied by cellular redistribution of regulatory subunits of cyclic AMP-dependent protein kinase. Mednieks, M.I., *et al.* 1057

Interaction of salivary fibronectin with oral streptococci. Babu, J.P., *et al.* 1094

SUBMANDIBULAR

Aryl hydrocarbon hydroxylase activity in rat submandibular glands. Murakami, K., *et al.* 39

Effect of x-ray irradiation on lipid peroxide levels in the rat submandibular gland. Nishi, M., *et al.* 1028

SALIVARY PROTEINS

Exocytosis in rat parotid acini after *in vitro* treatment with forskolin is accompanied by cellular redistribution of regulatory subunits of cyclic AMP-dependent protein kinase. Mednieks, M.I., *et al.* 1057

Phosphorylation of salivary proteins by salivary gland protein kinase. Madapallimattam, G., *et al.* 405

SALTS

Effects of certain salts on glucosyltransferase synthesis by *streptococcus mutans* strain PS-14. Takada, K., *et al.* 452

Effects of neutral salts in a bench-scale caries model. Brown, W.E., *et al.* 1115

Wetting properties of human saliva and saliva substitutes. Vissink, A., *et al.* 1121

SECRETORY INITIATORS

Chlorpromazine inhibition of muscarinic-cholinergic responses in the rat parotid gland. Van der Ven, P.F., *et al.* 382

SEROTONIN

Influence of 5-hydroxytryptamine (serotonin) on blood flow in the dog pulp, The. Kim, S., *et al.* 682

SERUM GLOBULINS

Susceptibility of *bacteroides gingivalis* to bactericidal activity of human serum. Okuda, K., *et al.* 1024

SILICON

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

SKIN

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

SORBATE

Effects of sorbate on oral streptococci grown in continuous culture, The. Rogers, A.H. 895

SORBITOL (*see* Sweetening Agents)

SPECIAL ISSUES

Abstracts of papers, annual session, American Association for Dental Research. 162*ff*

Abstracts of papers, International Association for Dental Research, Continental European Division, Scandinavian Association for Dental Research. 714*ff*

Foods, nutrition and dental health consensus conference on methods for assessment of the cariogenic potential of foods. 1473*ff*

SPECTRUM ANALYSIS

Micro-Raman line broadening in synthetic carbonated hydroxapatite. de Mul, F.F.M., *et al.* 437

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

STAINS AND STAINING

Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424

STATISTICS/STATISTICAL ANALYSIS

Examiner reliability in dental radiography. Valachovic, R.W., *et al.* 432

High-copper amalgam evaluated after three years in city and country practices, A. Smales, R.J., *et al.* 1353

Interpreting the correlation coefficient when one of the variables is discrete. Appleton, D.R., *et al.* 1346

Percent agreement, Pearson's correlation, and Kappa as measures of inter-examiner reliability. Hunt, R.J. 128

STOMATITIS, APHTHOUS

Humoral responses and cross-reactivity to viridans streptococci in recurrent aphthous ulceration. Hoover, C.I., *et al.* 1101

STREPTOCOCCUS

NOTE: Articles that report on findings involving more than one strain of *streptococcus* are listed under this general heading. Articles reporting on a specific strain are listed under those particular sub-headings.

Comparative recovery of *streptococcus mutans* on five isolation media, including a new simple selective medium. Schaeken, M.J.M., *et al.* 906

Effects of highly concentrated stannous fluoride and chlorhexidine regimes on human dental plaque flora. Schaeken, M.J.M., *et al.* 57

Effects of sorbate on oral streptococci grown in continuous culture, The. Rogers, A.H. 895

Growth of micro-organisms from supragingival dental plaque on saliva agar. De Jong, M.H., *et al.* 85

Humoral responses and cross-reactivity to viridans streptococci in recurrent aphthous ulceration. Hoover, C.I., *et al.* 1101

In vitro studies of growth and competition between *S. salivarius* TOVE-R and mutans streptococci. Kurasz, A.B. 1149

MUTANS

Dental benefits of limited exposure to fluoridated water in childhood. Burt, B.A., *et al.* 1322

Effect of low levels of fluoride in solution on enamel demineralization *in vitro*. Margolis, H.C., *et al.* 23

Effects of certain salts on glucosyltransferase synthesis by *streptococcus mutans* strain PS-14. Takada, K., *et al.* 452

Evidence suggesting multiple binding sites in experimental pellicles for *streptococcus mutans* JBP. Peros, W.J., *et al.* 1332

Genetic analysis of *streptococcus mutans* virulence and prospects for an anticaries vaccine. Curtiss, R. III 1034#

Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30

Intra-oral effect on enamel demineralization of extracellular matrix material synthesized from sucrose by *streptococcus mutans*, The. Zero, D.T., *et al.* 918

Tight genetic linkage of a glucosyltransferase and dextranase of *streptococcus mutans* GS-5. Burne, R.A., *et al.* 1392+

SANGUIS

Kinetic analysis of *streptococcus sanguis* adhesion to artificial pellicle. Cowan, M.M., *et al.* 1278+

Interaction of salivary fibronectin with oral streptococci. Babu, J.P., *et al.* 1094

Identification of a *streptococcus sanguis* receptor for salivary agglutinins. Robinovitch, M.R., *et al.* 98

STREPTOZOTOCIN DIABETES

Effect of streptozotocin diabetes on gingivitis in plaque-susceptible rats. Takai, N., *et al.* 49

STRONTIUM

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

SUBMANDIBULAR GLAND (*see* Salivary Glands)

SUBSTANCE P

Effects of substance P and substance P antagonists on rat salivary secretion. Bobyock, E., *et al.* 1427

SUCROSE (*see* Sweetening Agents)

SULFIDES

Tarnishing *in vivo* of Ag-Pd-Cu-Zn alloys. Herø, H., *et al.* 1303

SWEETENING AGENTS

Diet, nutrition, and food cariogenicity, Burt, B.A., *et al.* 1475

Enamel demineralization and the length of intra-oral exposure to different concentrations of glucose or sucrose. Tehrani, A., *et al.* 139

In vivo measurements of sulcal plaque pH after topical applications of sorbitol and sucrose in rats fed sorbitol or sucrose. Firestone, A.R., *et al.* 1020

In vivo measurements of sulcal plaque pH in rats after topical applications of xylitol, sorbitol, glucose, sucrose, and sucrose plus 53 mM sodium fluoride. Firestone, A.R., *et al.* 44

Intra-oral effect on enamel demineralization of extracellular matrix material synthesized from sucrose by *streptococcus mutans*, The. Zero, D.T., *et al.* 918

Theoretical analysis of the effects of plaque thickness and initial salivary sucrose concentration on diffusion of sucrose into dental plaque and its conversion to acid during salivary clearance, A. Dawes, C., *et al.* 89

Wetting properties of human saliva and saliva substitutes. Vissink, A., *et al.* 1121

SWINE

Dental fluorosis developed in post-secretory enamel. Richards, A., *et al.* 1406

In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410

TEMPORAL MUSCLE

Adaptations in the temporalis muscles of rabbits after masseter muscle removal. Guelinckx, P., *et al.* 1294

TEMPOROMANDIBULAR JOINT/ SYNDROME

Reliability of a craniomandibular index. Fricton, J.R., *et al.* 1359

TISSUE CULTURE

Effects of ammonia and volatile fatty acids produced by oral bacteria on tissue culture cells. van Steenbergen, T.J.M., *et al.* 909

TOMOGRAPHY

Enhancement of tomosynthetic images in dental radiology. van der Stelt, P.F., *et al.* 967

TOOTH (*see also* Molar, Dental Enamel)

Actinomyces viscosus colonization of mouse teeth. Crawford, P.C., *et al.* 105

Cinephotographic study of the role of the canine in limiting lateral jaw movement in *macaca fascicularis*, A. Kay, C.N., *et al.* 1300

Demonstration of structural variation in rat incisor dentin as determined by the x-ray laue method. Mishima, H., *et al.* 932

Image analysis system for the determination of tooth dimensions from study casts: comparison with manual measurements of mesiodistal diameter, An. Brook, A.H., *et al.* 428

Measurement of the permeability of dental enamel and its variation with depth using an electrochemical method. Hoppenbrouwers, P.M.M., *et al.* 154

Surface enamel fluoride concentrations of different types of human teeth in a high- and near-optimal fluoride area. Grobler, S.R., *et al.* 945

Variables affecting measurements of vertical occlusal force. Fields, H.W., *et al.* 135

TOOTH ABRASION

Effect of abrasion medium on wear of stress-bearing composites and amalgam *in vitro*. De Gee, A.J., *et al.* 654

TOOTH CALCIFICATION

Correlated observations and analysis of maturation-ameloblast morphology and enamel mineralization. Debari, K., *et al.* 669

Fluoride uptake and retention at various stages of rat molar enamel development. Bawden, J.W., *et al.* 34

TOOTH DEMINERALIZATION

Demineralization models:mechanistic aspects of the caries process with special emphasis on the possible role of foods. Ten Cate, J.M. 1511†

Demineralization/remineralization (working group report). Featherstone, J.D.B. (chairman), *et al.* 1532†

Effect of low levels of fluoride in solution on enamel demineralization *in vitro*. Margolis, H.C., *et al.* 23

Effect of pH, concentration, and treatment time of aluminum solutions on acid dissolution of enamel. Putt, M.S., *et al.* 1356

Effects of two fluoride gels on fluoride uptake and phosphorus loss during artificial caries formation. Mellberg, J.R., *et al.* 1084

Enamel demineralization and the length of intra-oral exposure to different concentrations of glucose or sucrose. Tehrani, A., *et al.* 139

Induction of chondrogenesis in muscle, skin, bone marrow, and periodontal ligament by demineralized dentin and bone matrix *in vivo* and *in vitro*. Inoue, T., *et al.* 12

Influence of chemically-induced modification of root surfaces on cell migration, attachment, and orientation, The. Lowenberg, B., *et al.* 1010

Integration of methods (working group consensus report). Stamm, J.W. (chairman), *et al.* 1537†

Intra-oral effect on enamel demineralization of extracellular matrix material synthesized from sucrose by *streptococcus mutans*, The. Zero, D.T., *et al.* 918

In vitro methods for testing the cariogenic potential of foods. Clarkson, B.H. 1516†

Kinetics of dissolution of tooth enamel — a constant composition study, The. Chen, W.C., *et al.* 663

Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955

TOOTH DISCOLORATION

Dental caries and staining after twenty-eight months of rinsing with stannous fluoride or sodium fluoride. Leverett, D.H., *et al.* 424

TOOTH ERUPTION

Effect of intermittent forces on eruption of the rabbit incisor, The. Proffit, W.R., *et al.* 118

TOOTH EXFOLIATION

Ultrastructural study of tooth resorption in the kitten, An. Ten Cate, A.R., *et al.* 1087

TOOTH EXTRACTION

Establishment of a large collection of extracted teeth for research. Jablonski, N.G., *et al.* 123

TOOTH LOSS

Tooth loss and retention: analysis on 500 maxillae of a multitribal group of Bantu-speaking South African blacks. Tal, H., *et al.* 456

TOOTH REMINERALIZATION

Demineralization/remineralization (working group report). Featherstone, J.D.B. (chairman), *et al.* 1532†

Inhibition of acid production from oral bacteria by fluorapatite-derived fluoride. Harper, D.S., *et al.* 30

Integration of methods (working group consensus report). Stamm, J.W. (chairman), *et al.* 1537†

In vivo bovine enamel remineralization and fluoride uptake from two dentifrices containing different fluoride concentrations. De Kloet, H.J., *et al.* 1410

In vivo effects of a SnF_2 gel on acid-softened enamel. Clark, J.W., *et al.* 698

In vivo remineralization by a monofluorophosphate dentifrice as determined with a thin-section sandwich method. Mellberg, J.R., *et al.* 1078

Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959

Theoretical study of *in vivo* lesion repair using a controlled-release device, A. Greene, W.M., *et al.* 1169

Ultrastructural study of tooth resorption in the kitten, An. Ten Cate, A.R., *et al.* 1087

TOOTH ROOT

Histologic study of the width and nature of interradicular spaces in human adult pre-molars and molars, A. Heins, P.J., *et al.* 948

Influence of chemically-induced modification of root surfaces on cell migration, attachment, and orientation, The. Lowenberg, B., *et al.* 1010

Remineralization by a monofluorophosphate dentifrice *in vitro* of root dentin softened by artificial caries. Mellberg, J.R., *et al.* 959

Root caries in an optimally fluoridated and a high-fluoride community. Burt, B.A., *et al.* 1154

Vulnerability of unexposed human dental roots to demineralization, The. Hoppenbrouwers, P.M.M., *et al.* 955

TOOTH SIZE

On the non-existence of compensatory tooth size interaction in a contemporary human population. Kieser, J.A., *et al.* 1105

TRIAZINES

Triazine monomers and their adhesion to dentin. Lee, C.H., *et al.* 1402

TURNER'S SYNDROME

Size of the alveolar arch of the mandible in relation to that of the maxilla in 45,X females. Laine, T., *et al.* 1432

ULCERS

Liposomes as drug carriers for oral ulcers. Harsanyi, B.B., *et al.* 1133

VACCINES

Genetic analysis of *streptococcus mutans* virulence and prospects for an anticaries vaccine. Curtiss, R. III 1034*

VEILLONELLA

Production and degradation of formate by *veillonella dispar* ATCC 17745. Hoshino, E., *et al.* 903

VITAMIN A

In vivo and *in vitro* study of the effects of vitamin A deficiency on rat third molar development. Harris, S.S., *et al.* 1445

VITAMIN D

Mandibular growth and histologic changes in condylar cartilage of rats intoxicated with vitamin D_3 or $1,25(OH)_2D_3$ and pair-fed (undernourished) rats. Weinreb, M. Jr., *et al.* 1449

X-RAY DIFFRACTION

Demonstration of structural variation in rat incisor dentin as determined by the x-ray laue method. Mishima, H., *et al.* 932

Explanation for the "two fiber axes" problem in human enamel by x-ray diffraction, An. Hirota, F. 978

X-RAYS

Effect of x-ray irradiation on lipid peroxide levels in the rat submandibular gland. Nishi, M., *et al.* 1028

XYLITOL (*see* Sweetening Agents)

ZINC

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315

ZIRCONIUM

Water sorption and filler characteristics of composites for use in posterior teeth. Oysaed, H. *et al.* 1315
